

**Figure S2. Validation of up-regulated genes in OAB by qRT-PCR.** Bar graph show real-time PCR expression of C3, C4a, Clip, Itih1, and Nid2 in the bladder urothelium of normal and OAB mice. The data are presented as relative expression following normalization. Data represented mean  $\pm$  SD. \*\*  $p < 0.005$ , \*\*\*  $p < 0.001$  versus normal.
